HISTORY

Despite his obvious brilliance, Hank McCoy was expelled from college because of his mutant status. Shortly thereafter, he was recruited by Professor Xavier to become a founding member of the X-Men.

Hank was born with super-strength, agility and intelligence, but he acquired his trademark blue fur during a brief sabbatical from the X-Men, when he ingested an experimental serum designed to activate latent mutations. He's temporarily morphed into other forms since, but he always seems to return to the bushy blue Beast he's best known as.

Hank is widely regarded as one of the world's greatest scientists and super heroes. In recent years, he's taken on more of a leadership role among the X-Men and mutant society at large, becoming the leader of X-Force.

PERSONALITY

Though something of a hothead in his youth, Hank developed a more stringently logical demeanor. If anything, the modern Beast has become impersonal, seeing his allies more as assets than people.
