HISTORY

Groot hails from Planet X and is an alien member of the Flora colossi race, a people who resemble trees and educate their young via photosynthesis. After rebelling against the way his people treated other intelligent species, Groot was banished from his homeworld, and he took to adventuring around the galaxy. There, he met his best friend, Rocket Raccoon, and along with him, joined the Guardians of the Galaxy led by Star-Lord (Peter Quill).

Groot has nearly been killed a number of times, but on each occasion, he managed to regrow himself from as little remaining of himself as a splinter. He seems dedicated to helping others, especially Rocket and their fellow teammates in the Guardians.

PERSONALITY

Groot is talkative and intelligent, but due to his stiff and inflexible larynx, it appears to others that he can only say "I am Groot." In actuality, those with a trained ear can discern what Groot is saying in the subtle sigh and breeze under the words.
